## Total Safety Guaranteed!

Welcome to a brand new catalogue from Reflex Safety Systems, the UK's leading manufacturer and distributor of passenger safety equipment.

Established nearly 40 years ago, Reflex offers all the equipment you need to ensure the total safety of your passengers from seat belts and wheelchair restraints to a wide range of safety related products such as child seats, fire extinguishers, first aid kits, safety hammers and high visibility clothing.

Each and every product has been carefully designed with the needs of vehicle operators, occupational therapists, people with special needs and their carers. But the products contained in this catalogue are only half the story. We also develop one-off products and solutions to meet individual needs. So, if you can't find exactly what you are looking for, just ask.

## New, easy to use catalogue

Our new catalogue has been designed with easy of use in mind and it covers many new areas of passenger safety. With this loose leaf format, as new products become available we will keep you updated. Should you have any comments or suggestions for improvements, please let us know.

## TYPE 3 GENIUS BUS BELT

Conceived by us some 14 years ago, the Genius Belt gives full inertia reel comfort together with adjustment for shoulder height making it suitable for children through to adults. The Type 3 Genius Bus Belt has the same features as the Type 4 belt, but has been designed to be fitted to seats without any upper anchor point. Available as standard or tailor made.

## ADULT 3 & 4 POINT HARNESS STATIC AND AUTOMATIC

3 and 4 point harnesses can be universally fitted and provide the highest degree of safety. With a variety of applications from full FIA approval for motor racing, to use in cars, off road vehicles and special harnesses for wheel chair passengers.

3 point harness can have an inertia reel fitted to the tail strap for increased mobility.

3 point harness with flat anchor plates

Alternative 4 point fixing

Harnesses can be manufactured to suit your particular application with a variety of lengths, anchor plates and buckles.

Further information on harnesses and wheel chair restraints see section 2.

For further options please refer to page 1.11

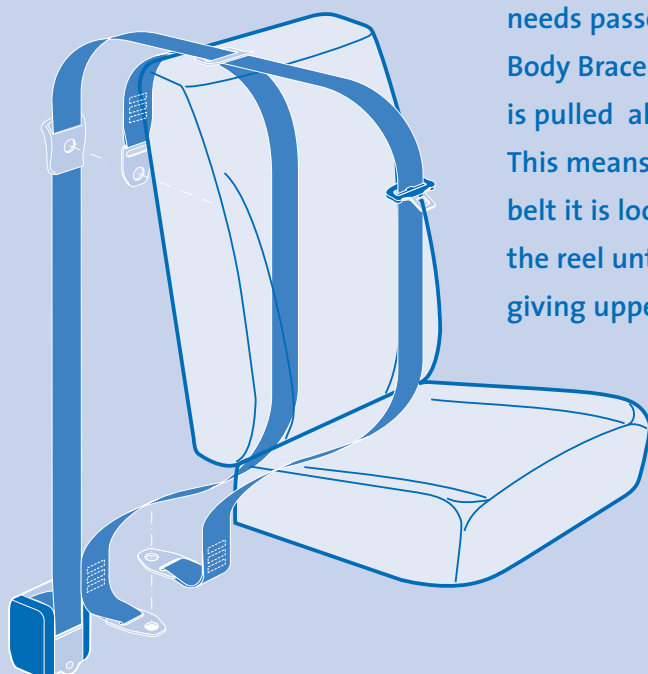

**REFLEX**  
safety systems

## GENIUS BELT WITH BODY BRACE SYSTEM

The Genius Body Brace System is available as a single or twin system. They can be used in the normal way as with any inertia reel seat belt, but for elderly or special needs passengers who need extra upper body support, the Body Brace System comes into its own. When the seat belt is pulled all the way out a ratchet mechanism is activated. This means that once the passenger is wearing the seat belt it is locked, no more webbing can be extracted from the reel until the seat belt has been fully retracted, thus giving upper body support similar to that of a full harness.

Also available as a twin system to give a diagonal seat belt across both shoulders.

The Body Brace System provides superior upper body support for the elderly and special needs passengers.

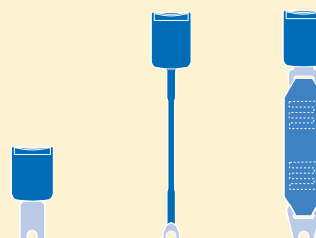

### ANCHOR PLATE OPTIONS

15° swivel   Flat swivel   15° fixed   Long

For further options please refer to page 1.11

### BUCKLE TYPE OPTIONS

Blade   Cable   Webbing

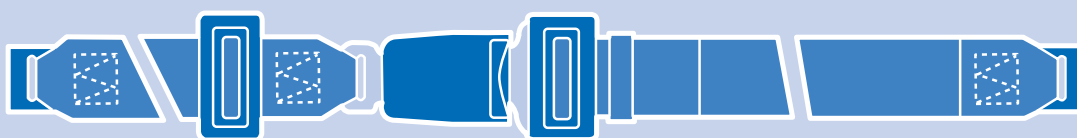

For further options please refer to page 1.12

## STATIC LAP STRAPS

Lap straps are probably the most versatile seat belt/restraint. They can be made to suit your requirements with a virtually unlimited range of lengths for the lap belt and a vast array of buckle types and anchor plates. They can be made to suit most applications.

Standard static lap strap with flat anchor plates and fixed length webbing buckle.

Static lap strap with 90° anchor plates with adjustor built into webbing buckle allowing both ends to be adjusted to suit your application.

These are just two of the lap belts available. Lap belts can be manufactured to suit many applications, we also have available all steel buckles.

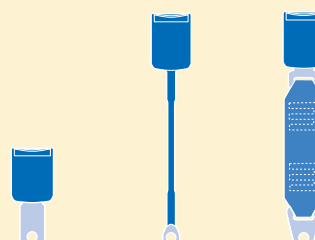

### ANCHOR PLATE OPTIONS

15° swivel   Flat swivel   15° fixed   Long

For further options please refer to page 1.11

### BUCKLE TYPE OPTIONS

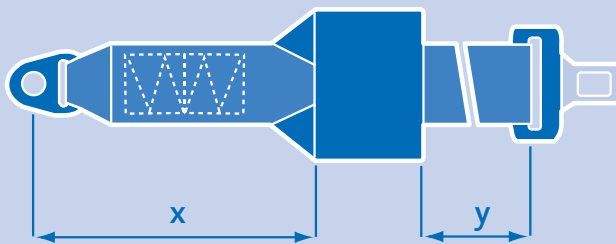

Blade   Cable   Webbing

For further options please refer to page 1.12

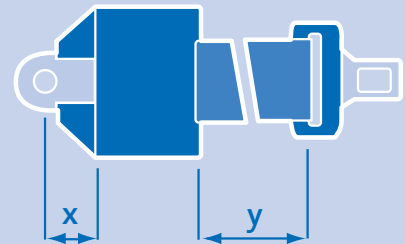

## AUTO LAP RETRACTORS

Auto Lap Retractors (ALR's) have many applications. Suitable for cars, minibuses and coaches as well as forklift trucks, amusement park rides and stair lifts they have many industrial applications.

### TYPE A

### TYPE B

ALR's are available in two basic formats as shown above. Type A with a webbing tail and Type B with a rigid blade fitting. The webbing tail (x) is available from 120mm upwards to suit your requirements. The standard belt length (y) for both Type A and B retractors is 1 metre, though specials can be made longer if required.

Reel Type	Length (x)	Length (y)	Buckle Type	Buckle Length
A	From 120mm	1000mm	Webbing Blade Cable	For buckle options please refer to page 1.12
B	25mm	1000mm	Webbing Blade Cable	For buckle options please refer to page 1.12

As with all our belts ALR's can be tailored to suit your requirements.

## CHOOSING A WHEELCHAIR RESTRAINT

### 4 Point Webbing Wheelchair Restraints

Simple but very effective way of restraining wheelchairs, both manual and powered. Consisting of four tie down straps in total, 2 of fixed length for front fitting and 2 adjustable straps for the rear fitting, with easy to use over centre buckles to allow tensioning of the whole system ensuring the chair is securely tied down. Designs available for both removable track fitting or permanent bolt down fitting.

Available in Standard (up to 90kgs) or Heavy Duty (up to 130kgs)

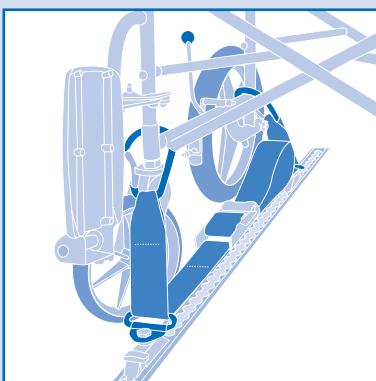

#### Part No WCT002 or Heavy Duty WCT/HD 002

A four point system with buckle and tongue fittings for the front and karabiner fittings for the rear.

#### Part No WCT001

A four point system with buckle and tongue fittings for both the front and rear mounting points

### Short Reach 4 Point Tie Down System

#### Part No WCT003

Designed to fit within the length of the wheelchair. Taking up less room than the conventional method when space is at a premium, with the possibility of getting more chairs into a vehicle or allowing for better access for seated passengers than previously possible. This is an unconventional system that is easy to use.

### Unoccupied Wheelchair Tie Down

#### Part No WCT005

Designed to restrain an un-occupied wheelchair either open or folded away. A simple pull to tighten / press to release cam buckle operation combined with two track fittings, make it quick and easy to use.

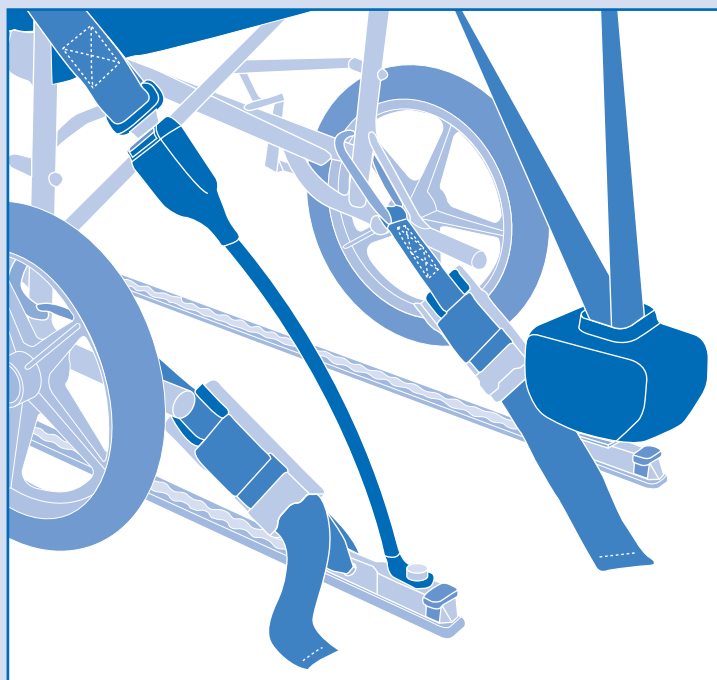

**We offer a design to fit service where an existing product will not suit individual requirements for a passenger or their wheelchair.**

**REFLEX**  
safety systems

## **WHEELCHAIR PASSENGER RESTRAINTS**

### **Combined 4 Point Wheelchair and Passenger Restraint**

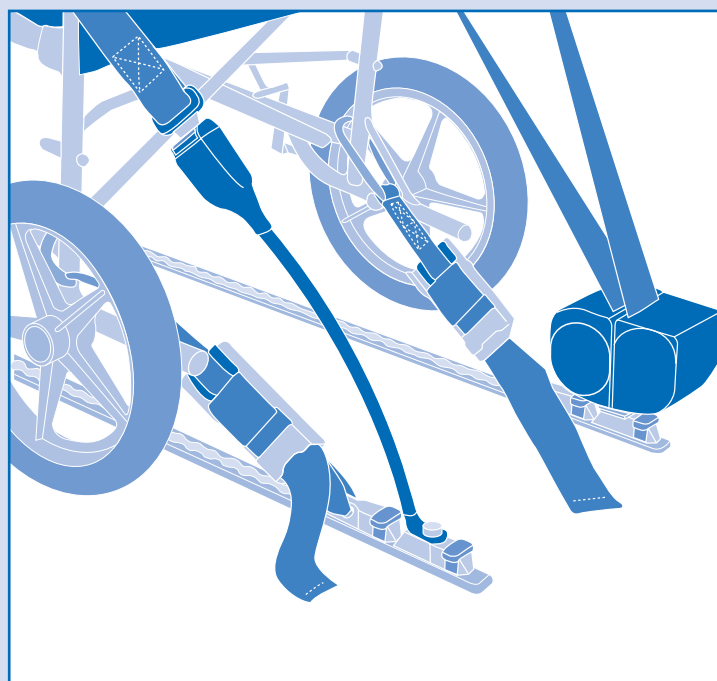

#### **Part No WCTPR004**

This combined passenger and wheelchair restraint system, means simply fitting one set of fittings into the tracking, taking up less time and space, than independent systems.

### **Dual Inertia Reel Seat Belt**

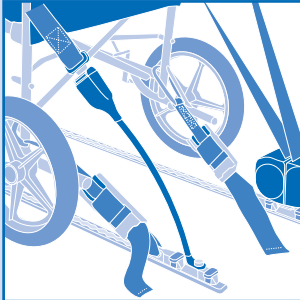

#### **Part No WCPR001**

Designed for ease of use and comfort to the occupant the dual inertia reel provides a lap and diagonal seat belt for the wheelchair passenger

## WHEELCHAIR PASSENGER RESTRAINTS

For passengers with poor upper body control we offer either a Dual Inertia System with a Body-Brace Retractor or 2 and 4 point full body harnesses.

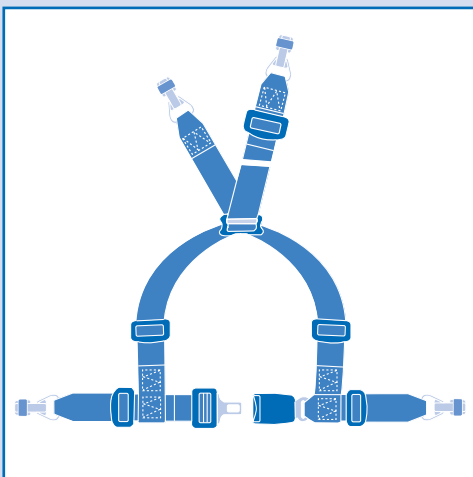

### Dual Inertia with Body-Brace

**Single System Part No WCPRo03**

**Twin System Part No WCPRo04**

This is ideal for operators who do not know who they may be carrying. It can work in the same way as the standard Dual Inertia or if required you can extend the seat belt webbing past a set point, once this has been done the webbing can be set to fit the occupant, it will then lock allowing no forward body movement. This is available as a single or twin restraint system.

The single system gives a lap and diagonal belt in the same way as the Dual Inertia system. The twin offers a full harness, utilising two sets of Inertia Reel body-Brace units.

Full harnesses give superb upper body restraint with full adjustment to both lap and shoulder straps.

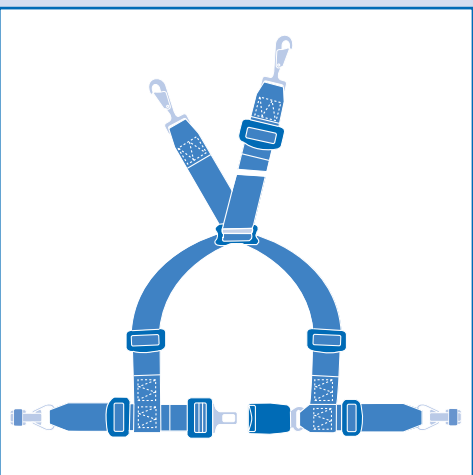

### 4 Point Full Body Harness

**Part No WCPRo05**

This is a four point adult wheelchair passenger harness with 4 track fitting point.

**Part No WCPRJ005**

A junior version of the WCPRo05 adult harness. Manufactured using 38mm webbing, buckles and adjusters. Suitable for children from 4 to approx 13 years of age.

### 2 Point Full Body Harness

**Part No WCPRo06**

Basically the same adult harness as the 4 point but only utilises two track fittings.

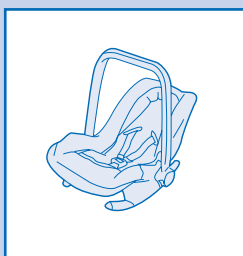

**Part No WCPRJ006**

A junior version of the WCPRo06 adult harness. Manufactured using 38mm webbing, buckles and adjusters. Suitable for children from 4 to approx 13 years of age.

## CHOOSING A CHILD SEAT

To assist you in selecting the correct child seat, our range is divided into several categories or groups by the weight range for which they are suitable. These groups correspond broadly to approximate age groups, but remember that it is the weight of the child which is the critical factor in choosing a suitable child car seat. We do not recommend that you use a forward-facing seat until a child is above the minimum weight (9kg) and able to sit unaided.

### Group 0

#### Up to 10kg (22lbs)

A rearward-facing seat which can be used in the front or rear of the car.

*Never use a rearward facing infant carrier or child seat on a passenger seat fitted with an airbag.*

### Group 0 +

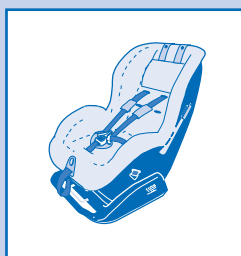

#### Up to 13kg (29lbs)

A rearward-facing seat which can be used in the front or rear of the car.

*Never use a rearward facing infant carrier or child seat on a passenger seat fitted with an airbag.*

### Group 1

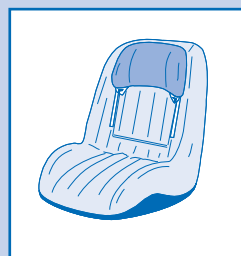

#### 9 - 18kg (20 - 40lbs)

A forward-facing seat which can be used in the front or rear of the car.

Generally these have a choice of upright and reclined positions.

### Group 2

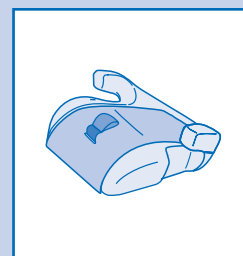

#### 15 - 25kg (33 - 55lbs)

A forward-facing seat or booster which can be used in the front or rear of the car. The booster seat lifts the child and positions adult lap and diagonal seat-belt correctly.

*N.B. A booster seat lifts the child, allowing the use of adult lap and diagonal seat-belts. Some may have shoulder-belt guides for added comfort.*

### Group 3

#### 22 - 36kg (48 - 79lbs)

A forward-facing seat or booster which can be used in the front or rear of the car.

The groups listed correspond to the weight ranges in European Standard applying to child car seats.

WHEN GROUPS OVERLAP - Some overlap between Groups/weight-ranges does occur. As car seats are designed with versatility in mind, you will notice that certain of our child seats are approved in two groups or more.

Just remember the child's weight is the determining factor in selecting the right seat.

**With over 34 years experience in child restraints for all modes of transport we will find the right solution for your seating requirements.**

**Please call our child seat hotline; 020 8204 0200 for further information and expert advice.**

**REFLEX**  
safety systems

## SPECIAL NEEDS CHILD SEATS 1

### Junior Traveller Group 1 and 2

An extremely versatile car seat offering comfort and security for the child from 9kg to 25kg with special needs. Easily installed using a lap and diagonal seat belt. Removable foam pads and rolls under the cover give support where required.

### Traveller Plus Group 2 and 3

An extremely adaptable car seat offering comfort and security for children from 15kg to 36kg with special needs. Easily installed using a lap and diagonal seat belt. A wide range of optional accessories is available to suit each child.

Various accessories to aid support are available for these seats

Please call our child seat hotline; 020 8204 0200 for further information and expert advice.

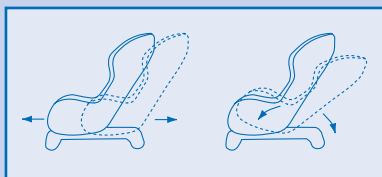

**REFLEX**  
safety systems

## SPECIAL NEEDS CHILD SEATS 2

**Be Safe Seat**  
Group 0-1

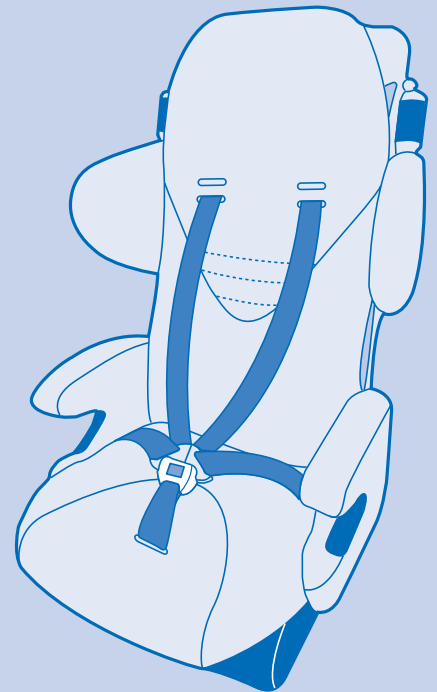

Fully Adjustable

A rearward facing seat which is suitable for children up to 4 years of age (0 - 18kg) and forward facing 9 months to approximately 4 years of age (9 - 18kg).

Ideal for a young child with poor upper body support.

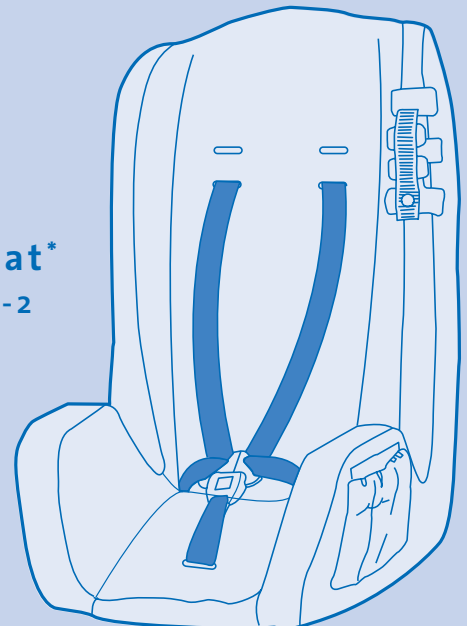

\* Available as standard without harnesses.

**Recaro\***  
Group 1-3

This seat is fully adjustable and suitable for children aged approximately 9 months to 12 years (9 - 36kg). It is variable in height, width and seat length, guaranteeing a correct posture.

**Euroseat\***  
Group 1-2

A seat suitable for children from 8 months to 7 years of age (9 - 25kg) and for use on front or rear seats with adult 3 point seat belts.

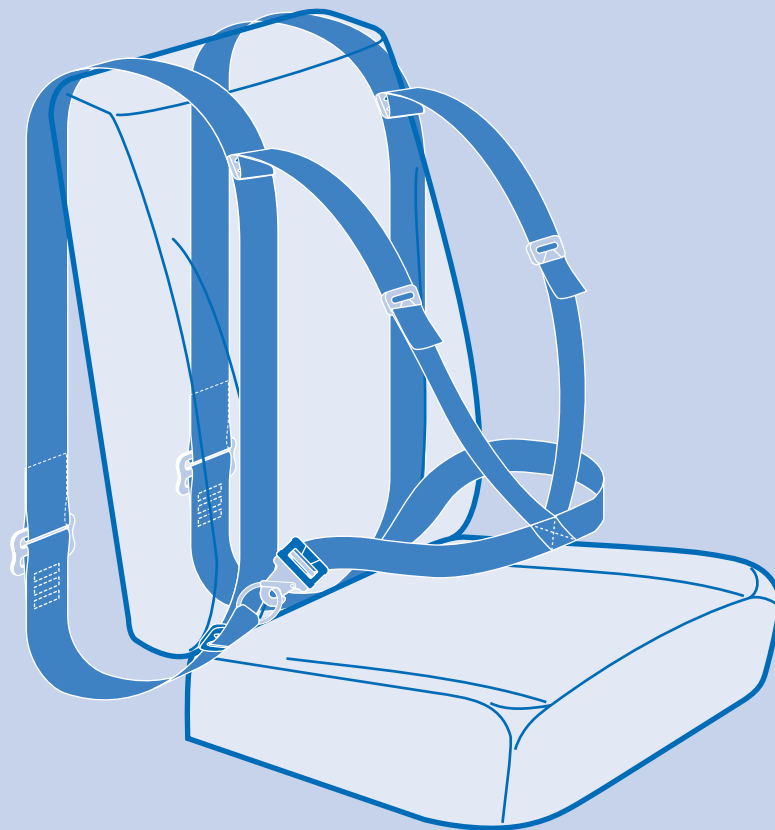

Please call our child seat hotline; 020 8204 0200 for further information and expert advice.

**REFLEX**  
safety systems

## HYPERACTIVE RESTRAINTS

This harness has been designed for hyperactive passengers, being one piece with no buckle at the front. They have a release mechanism each side. Harness is available detachable or permanently fitted.

A crotch strap  
is available

Available in two sizes: Age 4 - Teenage  
Adult

Please call our hotline; 020 8204 0200 for further information and expert advice.

## HAND HELD FIRE EXTINGUISHERS

All manufactured and tested to BSEN3 the current standard by which hand held fire extinguishers must meet.

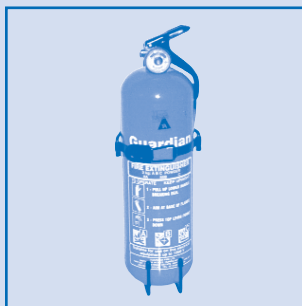

### **2 Litre AFFF**

**Code FEX001**

Replaces the commonly used 0.9 litre units that no longer meet with British and European standards. Use only on 12 and 24 volt systems, or non electrical applications.

Rating: 5A 55B

### **2kg ABC Powder**

**Code FEX002**

Not recommended for PCV (passenger carrying vehicles), but can be used on service/maintenance vehicles and many other applications including electrical systems.

Rating: 8A 55B C

### **1kg ABC Powder**

**Code FEX003**

Not recommended for PCV (passenger carrying vehicles), but can be used on service/maintenance vehicles and many other applications including electrical systems.

Rating: 5A 34B C

### **Fire Extinguisher Protective Case**

**Code FEX101**

Plastic weatherproof container suitable for fire extinguishers up to 2kg or 2 litre. Can be fitted into position or used as a carrying case.

## CHOOSING A FIRST AID KIT

All come in durable plastic case with hinged lid and carry handle. Contents suitable for dealing with minor incidents. Every mini bus must have one, required by law under the Road Traffic Act 1986.

### Economy PCV Kit

**Code FAK001**

Complies with C&U regulations 1986.

### Standard PCV Kit

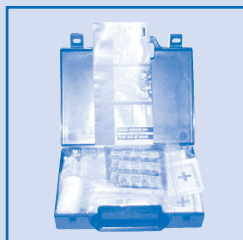

**Code FAK002**

Complies with C&U regulations 1986.

Comes complete with mounting bracket.

## Premier Kits

Designed to be functional and useable by someone with little or no first aid training. Conforming with C&U regulations 1986 and containing additional items as listed for each kit.

### Premier Kit 1

**Code FAK003**
